# Critiques – Us (BestBytes)

- We are great!
- We had a hard time finding a topic, someone took Music
- Scraping pure HTML is horrible and we avoided it
- Fat cats that can't wipe their butt and trump randomly appear on the front page, great success!

# Critiques – Them (VGCIDB)

- It was a great idea!
- Where are platforms in the game table?
- Hard time pulling individual large images
- It was insanely comprehensive, what is the 3DO?

**NOT SURE IF FAIR CRITIQUE**
